Technology is set to change the construction industry. New and emerging technologies are showing potential to reduce risk, improve productivity, and increase profitability on construction projects. However, overall tech adoption amongst contractors remains low, as many lack the resources to explore and navigate the vast universe of available solutions.

AXA XL is ready to help. As your partner in risk, we are committed to supporting our customers’ knowledge and adoption of construction technologies.

AXA XL’s Technology Adoption Maturity Index (TAMI) is a unique benchmarking service that evaluates a contractor’s level of construction technology adoption against their industry peers. The assessment provides both a quantitative score and qualitative suggestions to help our customers reduce risk and advance their business through technology. TAMI provides a roadmap for technological advancement, tracking progress over time so customers can remain at the cutting edge of innovation year after year.
Here’s how it works

- The TAMI assessment involves a 90-min exploratory discussion on what types of construction technologies your company has adopted, and to what extent they are implemented across your enterprise.
- Attendees should include the Risk Manager and any others who have deep knowledge of your construction technology usage and implementation, e.g. Chief Data Officer, Director of Innovation, Director of Technology, etc.
- The deliverable is a personalized report, which includes your overall TAMI score and individual scores across all categories. The report compares your technology adoption against current industry trends and hand-selected group of your peers. We highlight areas where your adoption is industry-leading, and provide suggestions on focus areas to further advance on your tech adoption journey.
- Our suggestions are supported by our Preferred Partners - our curated suite of technology solutions with preferred terms exclusively for our customers.

Categories we review:

- Enterprise Software
- Field Management
- IoT Sensors
- Reality Capture
- Tech Innovation Commitment

As the industry continues to advance in technological maturity, so should your adoption. Customers are encouraged to revisit the TAMI each year to advance your knowledge of new tech solutions and continue progressing on your technology adoption journey.

What our customers are saying about TAMI

“TAMI helped to highlight where our technology needs are greatest. It has led us to partner further with AXA XL to develop a Technology Committee to take a closer look at ways in which we can better utilize technology to maximize efficiency and profitability.”
- Chief Information Officer, Bell & Associates

“TAMI has helped highlight the areas we are doing well in, as well as the areas we could improve, and to see how our technology adoption compares to others in the industry.”
- Operations Technology Manager, Andres Construction

“TAMI…was a beneficial exercise for our company to undergo - the process was simple and the results clear. It was also helpful in highlighting areas that we could spend additional effort in driving solutions to make us better as an organization.”
- Director - Strategy and Technology Investment, The Haskell Company

“TAMI was very helpful in providing [us] perspective on the maturity of our technology organizations, especially as compared to our peers and the industry at large. We came away with specific strategic areas to work on and ideas on how we can add value to our business.”
- Chief Information Officer, Swinerton
