

ArtProtect

AXA XL Insurance aims to help preserve the cultural heritage for future generations and support all those who want to preserve it safely.

The objective of GRASP is to provide the individual facility with a single summary report which assesses specific risk/safety factors against standard criteria. To do this, answers from over 2000 questions used by an on-site independent, professional security risk surveyor are distilled into matrices which profile the processes and functions of the facility.

Whenever a facility that has been visited achieves a positive scoring of above 80% a certificate is issued. The term “artprotect” is the trademarked term used for the certificates. Some of the institutions use this certificate “AXA ArtProtect approved” in their webpages as a quality certification.

E.g. <https://www.crozierfinearts.com/affiliations/The artprotect™> initiative helps our clients and constituents protect and maintain their art and collectibles collections for enjoyment by all.
