

Environmental

## Watch It! Risk Resource Safety Portal

You want your operations and project sites to be incident-free and get your people home safely at the end of the day. So do we. That's why AXA XL developed **Risk Resource** to deliver vital risk management and safety information to your team at their desks or in the field.

## What is Risk Resource?

Risk Resource is an Internet-based portal that provides your people tools and strategies to help keep them safe, healthy and productive. There's a lot of helpful content, including videos on:

- back injury prevention
- effective safety training
- introducing change
- driver safety awareness

We also include whitepapers and articles on risk management and safety topics, written by our own environmental casualty risk engineers.

We'll continue to add relevant safety & risk management videos and articles based on current events in your industry and from your feedback.

## How it works

Once you're signed up, you'll receive a series of regularly scheduled e-mails that will link you to the site and the most recent content. You can access the portal from your computer, Smartphone or tablet device.

And here's the best part. Access to Risk Resource is provided free of charge to AXA XL's Environmental Casualty policy holders.

Feel free to share your Risk Resource emails with others in your organization. If there's someone you'd like to receive Risk Resource directly, just let us know.

FYI, the emails will come to you from AXA XL Risk Resource Online <noreply@shoutout.axaxl.com> so you can be sure they get to your in-box.

## We want to hear from you

The Environmental Casualty team has put together Risk Resource to help you. Help us keep it relevant and let us know if there's anything you'd like to see us cover.
